Phoenix R250 - LGR Dehumidifier

COMPACT, PATENTED ByPASS™ TECHNOLOGY

The Phoenix R250 has been redesigned from the inside out to be a rugged, high-performance dehumidifier. Phoenix is leading the industry by introducing epoxy coated coils. This new feature will extend the life of the coils, provide protection in corrosive environments, and maintain the coil's heat transfer ability over the life of the coil.

We kept the outstanding handle used on the R200 along with patented ByPass™ Technology, excellent airflow, multiple ducting options, and a pleated media filter. And, with some amazing Phoenix Engineering, the R250 removes the most water of the Phoenix rotomolds at 135 pints per day (AHAM) while drawing only 8.3 amps of electricity, making it one of the smallest, lightest XL category LGRs on the market.

FEATURES

- Epoxy Coated Coils
